i-NETT Helps Companies Transition to Remote Workforce

*Leading Managed Technology Services
Company Giving Businesses the
Capability to Work From Home*

LOS ANGELES/VENTURA/ORANGE COUNTY/SAN DIEGO – March 2020 - i-NETT a leader in managed technology services, announced today that the company is proactively helping small to mid-sized businesses (SMBs) rapidly transition to a remote workforce. With the recent outbreak of COVID-19, mandatory precautions have forced organizations to adopt a work from home policy. i-NETT has been setting up remote workforces for years and their expertise has enabled the company to be in the leader in their community and enable organizations to make a successful transition in a very short period of time.

Working from home is just as productive as working in the office if you have the right technology and the right provider guiding you along the way. Today's technology that is a must for collaboration, communication, and productivity includes voice, videoconference, instant message, Office365, Microsoft Teams and access to files

whether cloud-based or via VPN. Cybersecurity solutions is a necessity as well because there has been a substantial increase in cyberattacks. Hackers are sending a flurry of COVID-19 phishing attacks and are preying on workers sitting at home hoping to gain access to personal and company information.

“These are unprecedented times for companies and employees alike,” said Dale Stein, Co-Founder of i-NETT. “Organizations have been asked to transition to a remote workforce, which is totally new for them. They don't know what to do or where to begin. That's where i-NETT comes in. We have had tremendous experience in this area because we have been doing this for our customers for many years. We have the technology and a team of professionals that can rapidly take a company remote quickly. Plus, we give our customers guidance on how to use technology to manage a remote workforce and ensure collaboration and productivity happens.”

ABOUT I-NETT

Founded in 1982, i-NETT is Southern California's leading data and voice company. The company's mission is to increase its customers' profitability, improve their productivity and give them a competitive advantage by implementing the right technology. i-NETT is the only provider that protects its customers from the two risks of technology - obsolescence and cost. As a trusted technology advisor, i-NETT has earned the position as a market leader and serves customers' business through quality products and services.

As a premier member of Technology Assurance Group, i-NETT is able to fulfill all of its customers' technology needs. This means that the organization is the ultimate resource for business phone systems (VoIP and Session Initiation Protocol (SIP) provisioning), Managed IT Services, Network Security, Video Conferencing and Disaster Recovery.
