## **i-NETT Protects SMBs from Exponential Growth in Cybercrime**

*Leading Managed Technology Services  
Provider Educates Businesses on  
Dramatic Increase in Cybercrime  
Directed at Small-Business Owners  
and How to Prevent It*

LOS ANGELES/VENTURA/ORANGE COUNTY/SAN DIEGO – December 2020 - i-NETT, a leading managed technology services provider (MTSP), announced today that it is educating companies on the dramatic spike in cybercrime targeted towards small to mid-sized (SMB) businesses. Cybersecurity Ventures predicted that “cybercrime will cost the world \$6 trillion annually by 2021, up from \$3 trillion in 2015.” Effectively, this means that criminals have access to unlimited budgets to increase the sophistication of their attacks, meanwhile, business owners are doing little or nothing to defend themselves. Those diverging trendlines signal a precarious future. Furthermore, due to COVID-19, most businesses have been forced to operate remotely which has increased their reliance on home networks to perform their daily duties. This increased reliance on insecure home networks has left them more susceptible to breaches than ever before.

Most business owners are aware of this problem, but disregard it as a distant threat that can be eliminated through the standard cybersecurity solution – which is comprised of a prepackaged firewall, anti-virus/malware protection and data backup plan. However, while that used to be a sufficient solution, it’s

unfortunately no longer appropriate. Hackers are constantly evolving their methods and as they find new ways of causing a breach, new technologies are needed to combat these advances. The gap is widening and is also showing no signs of slowing. In fact, according to Accenture, “Security breaches have increased by 67% since 2014.” This fact suggests that while prior dismissals may have been the appropriate business decision at the time, now, businesses must take proactive action to support their staff, especially while they increase their risk of breach in the mandated work-from-home work environment.

Dale Stein, Co-Founder of i-NETT, stated, “The game has completely changed and businesses need to understand the implications of inaction. For example, in most states, you’re legally obligated to publicly announce any breach to news outlets. This can do irreparable harm to a company’s reputation, which is an extremely costly burden to bear, especially when cybersecurity solutions are readily available to eliminate these risks.” Stein later added, “Regardless of which provider you use, the best tactic to employ is a layered approach. That way, breaches can be contained, assets can be protected and exposure is minimized. When a business is breached, it’s important to ensure that the whole company isn’t incapacitated.”

Another key factor that has changed is the average duration of a breach. Most people assume that a

typical breach, like a ransomware attack for example, results in a breach, demand for a ransom and resolution within a few days. However, according to IBM, “the average life cycle of a breach (from breach to containment) lasted almost 11 months.” The employee downtime from something like this can be a nightmare for management and in many instances, can put businesses on the brink of collapse.

In sum, businesses who have managed to survive the disruption that 2020 has caused need to reassess their security strategy for 2021 so that they don’t get caught in “survival-mode.” While business owners are being tested on every front, Stein summarizes why cybersecurity needs to be an immediate priority for every business in the modern age, “It takes 20 years to build a reputation and only a few minutes of a cyber-incident to ruin it.”

### **ABOUT I-NETT**

Founded in 1982, i-NETT is Southern California’s leading data and voice company. The company’s mission is to increase its customers’ profitability, improve their productivity and give them a competitive advantage by implementing the right technology. i-NETT is the only provider that protects its customers from the two risks of technology - obsolescence and cost. As its customers’ trusted technology advisor, i-NETT has

earned the position as the market leader and its customers' business through quality products and services.

i-NETT is a premier Member of Technology Assurance Group, an organization of leading managed technology services providers (MTSPs) in the United States and Canada representing \$500 million in products and services. This means that the organization is the ultimate resource for business phone systems (VoIP and Session Initiation Protocol (SIP) provisioning), Managed IT Services, Cybersecurity, Video Conferencing and Disaster Recovery.

i-NETT delivers future technology today! For more information, please visit please call 805.642.3558 or visit us at [www.i-nett.com](http://www.i-nett.com).
