## **i-NETT Takes the Lead in Transitioning Customers' IT Networks to Microsoft Azure**

*Leading Managed Technology  
Services Provider Helps  
Organizations Take Advantage of  
the Economic and Productivity  
Benefits of Moving to the Cloud*

LOS ANGELES/VENTURA/ORANGE COUNTY/SAN DIEGO – February 25, 2025 - i-NETT, a leading managed technology services provider (MTSP), is helping organizations transition their IT networks to Microsoft Azure. i-NETT is empowering organizations to leverage the economic and productivity benefits of moving their network to the cloud. With growing IT complexity, rapid AI innovation and strong demand for flexible hybrid work environments, i-NETT is helping to navigate this transition as efficiently, productively, cost-effectively, and profitably for their customers.

“The days of managing bulky on-premise servers have long been over,” said Dale Stein, CEO at i-NETT. “The maintenance costs, cybersecurity risks, obsolescence and restrictions that on-premise IT infrastructure pose is no longer a liability business owners need to tolerate. Small to mid-sized businesses (SMBs) and

non-profits are moving to Azure because there’s no need for them to host physical servers. More than ever, organizations are searching for ways to reduce operating costs, speed up the pace of collaboration and give their team more flexibility to accomplish their work, in a way that works for their lives. While the cloud has been nascent technology in years past, we’ve now reached the point in its development where it’s simply a superior technology and we foresee it enveloping on-premise servers.”

By moving to Azure, organizations no longer need to invest in physical servers, expensive leases or security efforts to secure them. This translates into significant cost savings and opens the door to a more agile IT environment. Additionally, Azure eliminates the problem of scattered data, enabling seamless collaboration across tools which integrate with everything that staff are already familiar with. While cost-efficiency and collaboration are most obvious explanations for why so many organizations are switching to Azure, the most significant reason is because of

how it bolsters cybersecurity. Everyone can now leverage all the resources that Microsoft is pouring into cybersecurity. In fact, Microsoft has committed to invest \$5 billion and also employs over 5,000 security professionals who are constantly figuring out ways to improve cybersecurity for every user. Since Microsoft has more resources and expertise at their disposal, organizations can expect to enjoy superior uptime and reliability which will far exceed any individual business’s capacity to deliver.

The shift to Azure aligns with key organizational objectives — like reducing large capital expenditures, improving collaboration and building a flexible infrastructure. Stein also added, “When customers realize they’re already paying for Microsoft 365 licensing and can access premium tools without the burden of maintaining hardware, the choice becomes clear.”

Their team is dedicated to guiding organizations through their transition to the cloud, ensuring a smooth process that prioritizes uptime, data security, and business continuity. Their focus is on simplifying networks, minimizing customer

responsibilities, and equipping business owners with IT systems that can grow without constraints.

“With Azure, organizations aren’t just upgrading their IT infrastructure; they’re future proofing it,” said Stein. “We’re excited to help unlock the power of the cloud, enabling all to achieve more with less.”

## **ABOUT I-NETT**

Founded in 1982, i-NETT is Southern California’s leading managed technology services provider. The company’s mission is to increase its customers’ profitability, improve their productivity and give them a competitive advantage by implementing the right technology. i-NETT is the only provider that protects its customers from the two risks of technology - obsolescence and cost. As its customers’ trusted technology advisor, i-NETT has earned the position as the market leader and its customers’ business through quality products and services.

i-NETT is a premier Member of Technology Assurance Group, an organization of leading managed technology services providers (MTSPs) in the United States and Canada representing \$800 million in products and services. This means that the organization is the ultimate resource for Managed IT Services, Cybersecurity, Cloud Solutions, Business Phone Systems (VoIP), and Video Surveillance. i-NETT delivers future technology today!
